

Appliances

Refrigerator

Washing Machine

Identifying appliance efficiency

During your virtual energy assessment, the energy specialist will refer to appliances in your home in order to determine if there are older, less efficient appliances that are eligible for replacement.

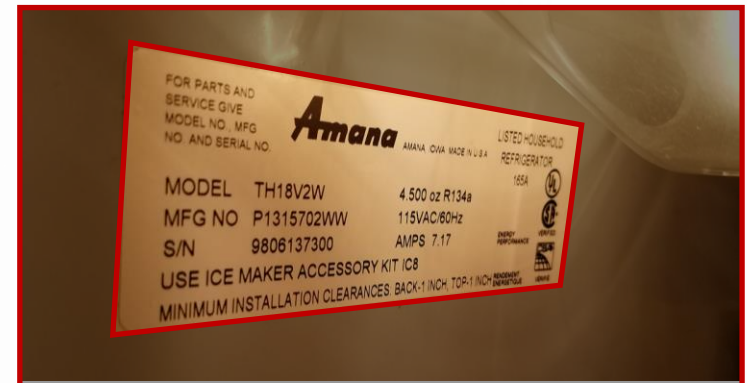

If you have older appliances in the home, use this guide to help the energy specialist confirm eligibility for replacement.

Taking photos like the ones below may be valuable during the assessment process.

Refrigerator

- Stand-back photo of the refrigerator
- The label can usually be found inside the unit on the side of the top shelf, or on the door.
